

- Large 'speed rated' castors.
- Fully floating all terrain linkage.
- Sweeps & collects driving forward.
- Large capacity hopper.
- Direct drive brush motor.
- Single hydraulic service operation.
- Quick fit or fork frame mounting.
- Quick change brush.
- Choice of brush bristle.
- Optional kerb brush.
- Optional dust suppression system.
- British manufacture.

A powerful heavy duty front mounted sweeper collector unit designed for the construction and plant hire industries. Fully floating hitch mechanism and large diameter 'speed rated' castors make light work of rough terrain, whilst the powerful direct drive brush motor and large capacity hopper ensure maximum sweeping performance. Shown above with optional fully floating kerb brush, the sweeper can be supplied with a quick fit mounting or fork frame to suit your requirements. Optional dust suppression water system is also available.

Model	Mount	Sweeping Width	Width	Depth Ex. Hitch	Height Ex. Hitch
DMX-240	Front	2.43m	2.71m	2.03m	0.81m
